PROFILE

Independent Egypt-based software developer with 16 months of hands-on Flutter/Dart experience. Shipped a Flutter Android app, worked on a bilingual Flutter/Laravel client pilot, and contributed eight merged engineering changes to public open-source repositories. Available for paid remote roles and focused contracts.

VERIFIED UPSTREAM ENGINEERING

- **Flutter framework | Web slider accessibility | PR #195564**
  Fixed Web slider semantics synchronization after enabling and added regression coverage. Merged Nov 4, 2026.
- **Dart-Code | Process-stubbed command tests | PR #6373**
  Replaced unnecessary real Dart/Flutter tool launches with deterministic test stubs; one focused local test group improved from ~24s to ~3s. DanTup-approved, merged Nov 7, 2026.
- **Dart-Code | DTD async lifecycle safety | PR #6349**
  Addressed post-disposal asynchronous callbacks and service request races with targeted regressions. Merged Nov 5, 2026.
- **Apple-maintained pkl-neovim | LSP integration | PR #75**
  Fixed nested Pkl LSP configuration and added a headless Neovim regression harness. Merged Nov 3, 2026.

Also merged in Dart-Code: #6301 (project discovery), #6324 (project creation tests), #6337 (SDK precedence tests), #6332 (package command regression tests). Full record: github.com/NemesisDevX

PRODUCTS & CLIENT WORK

- **Tasbehati | Published Flutter Android app**
  Shipped and maintained Arabic-first Quran, adhkar, prayer-time and tasbih features; Firebase, notifications, Android releases and production crash triage. Google Play: com.tasbehati.ai.pr
- **FamilyMove | Private client pilot - not a public launch**
  Flutter Android + Laravel 13/Filament 5. Family workflows, sessions, reporting/export, notifications, bilingual UI and consent-aware AI integration. Pilot validation is ongoing.

ENGINEERING TOOLKIT

Flutter, Dart, Android, Firebase, FCM, RTL, REST APIs | TypeScript, VS Code tooling, regression tests, CI | PHP, Laravel, Filament, SQL, Python, FastAPI, Docker, API testing, Git

EDUCATION AND AVAILABILITY

Egyptian secondary education in progress (expected 2027). Self-directed engineering through shipped software, upstream review and client delivery. Remote full-time, part-time and scoped contract opportunities.
